

CSS Selectors

CSS selectors are used to "find" (or select) the HTML elements you want to style.

We can divide CSS selectors into five categories:

- Simple selectors (select elements based on name, id, class)
- Combinator selectors (select elements based on a specific relationship between them)
- Pseudo-class selectors (select elements based on a certain state)
- Pseudo-elements selectors (select and style a part of an element)
- Attribute selectors (select elements based on an attribute or attribute value)

組合選擇器 [編輯]

CSS里現在共有4種組合選擇符 (Combinators) : [2]

符號	說明
A > B	子代選擇器，選擇A下一層的元素B
A ~ B	兄弟選擇器，選擇與A同層的元素B
A + B	相鄰兄弟選擇器，選擇與A相鄰的元素B (不能被任何元素相隔)
A B	後代選擇器，包含選擇符

flexbox

CSS Flexbox

CSS Flexbox

CSS Flex Container

CSS Flex Items

CSS Flex Responsive
